USEFUL TIPS

SHELF SAFETY SYSTEM

The oven features a new shelf safety system. This allows you to pull out the oven shelves when inspecting the food without danger of food spillages or shelves falling accidentally out of the oven. To remove the shelves pull out and lift.

GRILLING

Grilling makes it possible to give food a rich brown colour quickly. For browning we recommend that you insert the grill onto the fourth level, depending on the proportions of the food (see fig. page 4).

Almost all food can be cooked under the grill except for very lean game and meat rolls.

Meat and fish that are going to be grilled should first be lightly doused with oil.

COOKING TIME

For recommended cooking times and temperatures the first time you use the oven, refer to the tables on pages 5. You may then wish to vary these times and settings in the light of your own experience.

CLEANING AND MAINTENANCE

Clean the stainless steel and enamelled surfaces with warm, soapy water or with suitable brand products. On no account use abrasive powders that may damage surfaces and ruin the oven's appearance. It is very important to clean the oven each time that it is used. Melted fat is deposited on the sides of the oven during cooking. The next time the oven is used this fat could cause unpleasant odours and might even jeopardise the success of the cooking. Use hot water and detergent to clean; rinse out thoroughly.

Use detergents and abrasive metal pads like «brillo pads» for the stainless steel grills.

The glass surfaces as the top, oven door and warming compartment door must be cleaned when they are cold. Damage that occurs to them because this rule was not adhered to are not covered by the guarantee.

To replace the interior light: switch off the mains power supply and unscrew bulb. Replace with an identical bulb that can withstand very high temperatures.

SERVICE CENTRE

Before calling the Service Centre

If the oven is not working, we recommend that:

- you check that the oven is properly plugged into the power supply.

If the cause of the fault cannot be detected: disconnect the oven from the mains, do not touch the oven and call the after sales service.

Before calling the Service Centre remember to make a note of the serial number on the serial number specifications plate (see fig. on last page).

The oven is supplied with a guarantee certificate that ensures that it will be repaired free of charge by the Service Centre.

USING THE MINUTE TIMER

To set the cooking time, turn dial one complete revolution and then position the index to the required time. When the time has lapsed, the signal will ring for a few seconds.

This appliance is marked according to the European directive 2002/96/EC on Waste Electrical and Electronic Equipment (WEEE). By ensuring this product is disposed of correctly, you will help prevent potential negative consequences for the environment and human health, which could otherwise be caused by inappropriate waste handling of this product. The symbol on the product indicates that this product may not be treated as household waste. Instead it shall be handed

over to the applicable collection point for the recycling of electrical and electronic equipment. Disposal must be carried out in accordance with local environmental regulations for waste disposal. For more detailed information about treatment, recovery and recycling of this product, please contact your local city office, your household waste disposal service or the shop where you purchased the product.

OPERATING INSTRUCTIONS

Our range includes many different styles and colours. To find the technical specifications and functions of the model which you have bought, study the diagrams below. Some models feature push/pull knobs, press to eject before rotating. During oven operation the internal lamp is on.

STATIC OVEN - MULTI - FUNCTION OVEN

Function dial	Thermostat dial	FUNCTION	Static oven	Multi-function oven
		Turns on the oven light This will automatically activate the cooling fan (on fan cooled models only)	●	●
	50 ÷ MAX	Door closed Grilling The setting of this function switches on the infrared grill element. This function is ideal for cooking meats of medium thickness (sausages and bacon).	●	○
 **	50 ÷ MAX	Natural convection Bottom and top oven elements are used. This is the traditional form of baking and roasting. It is ideal for roasting joints of meat and game, baking biscuits and apples and making the food nice and crunchy.	●	●
	50 ÷ MAX	Lower Element This function is ideal for delicate dishes (pies-souffle).	●	○
	50 ÷ 200	Fan Assisted Grill (a): use the turbo-grill with the door closed The top heating element is used with the fan circulating the air inside the oven. Preheating is in necessary for red meats but not for white meats. Ideal for cooking thick food items, whole pieces such as roast pork, etc. Place the food to be grilled directly on the shelf centrally, at the middle level. Slide the drip tray under the shelf to collect the juices. Make sure that the food is not too close to the grill. Turn the food over halfway through cooking.	○	●
 *	50 ÷ MAX	Fan cooking Both top and bottom heating elements are used with the fan circulating the air inside the oven. We recommend you use this method for poultry, pastries, fish and vegetables. Heat penetrates into the food better and both the cooking and preheating times are reduced. You can cook different foods at the same time with or without the same preparation in one or more positions. This cooking method gives even heat distribution and the smells are not mixed. Allow about ten minutes extra when cooking foods at the same time.	○	●

* Tested in accordance with the CENELEC EN 50304.

** Tested in accordance with the CENELEC EN 50304 used for definition of energy class.

N.B. ● All models ○ Only on some models

TABLES OF COOKING TIMES

The overall suggested cooking times set out below are intended as a rough guide only. They may in fact vary according to the quality, the freshness, the size and the thickness of the food cooked and of course cooking time is also partly a matter of taste. Let the food stand for a few minutes before serving because the ingredients continue cooking after they have been removed from the oven.

HANDY TIP: Lower the temperature so as to avoid the surface of the food becoming hard and dry.

Food	Quantity	Static electric oven			Electric fan oven			Remarks
		Shelf	Time of cooking in minutes	Oven temperature	Shelf	Time of cooking in minutes	Oven temperature	
• Pasta								
Cannelloni	Kg 1,8	2	50 ÷ 60	220	2	40 ÷ 50	200	Put the cannelloni into an unheated oven
Oven baked pasta	Kg 2,5	2	55 ÷ 60	220	2	45 ÷ 50	200	Put the oven baked pasta into an unheated oven
• Baking (not cakes)								
Bread	Kg 1 di pasta	2	35 10 (pre-heating)	200	2	30 ÷ 35 10 (pre-heating)	180	Form the dough into a loaf and make a cross with a knife on top of the dough leave the dough to rise for at least 2 hours. Grease the baking tin and put the dough in the middle of it.
Pizza	Kg 1	1	25 ÷ 35	190	1	20 ÷ 25	190	Warm the oven for 15 minutes and place the pizzas on the greased baking tray. Garnish them with tomatoes, mozzarella, ham, oil, salt and oregano.
Pastry (frozen) vol au vents	n° 24	1	30 ÷ 35	220	2	25 ÷ 30	200	Place 24 vol au vents in the oven and bake.
• Meat								
All meats can be roasted in shallow or deep roasting trays. It is advisable to cover the shallow trays to avoid splattering the sides of the oven with grease. The roasting times are the same whether the meat has been covered up or not.								
Whole joint of beef	Kg 1	3	70 ÷ 80	220	3	50 ÷ 60	200	Put the meat into a deep Pyrex dish and season with salt and pepper; turn the meat half way through cooking.
Joint of deboned	Kg 1	2	100 ÷ 110	220	2	80 ÷ 90	200	Cook the meat in a covered Pyrex dish with herbs, spice, oil and butter.
• Fish								
Trout	3 whole trout or / Kg 1	2	40 ÷ 45	220	2	35 ÷ 40	200	Cover the trout with salt, oil and onions and cook in a Pyrex dish.
Salmon	700 g 2,5 cm slice	2	30 ÷ 35	220	2	30 ÷ 25	200	Cook the salmon in an open Pyrex dish with salt, pepper and oil.
Sole	Kg 1	2	40 ÷ 45	220	2	35 ÷ 40	200	Cook the sole with salt and a spoonful of oil.
Bream	2 whole ones	2	40 ÷ 45	220	2	35 ÷ 40	200	Cook the bream in oil and salt in a covered dish.
• Rabbits and Poultry								
Guinea fowl	Kg 1-1,3	2	60 ÷ 80	220	2	60 ÷ 70	200	Place the guinea fowl in a deep Pyrex or pottery dish with very little oil and season with herbs and spices.
chicken	Kg 1,5-1,7	2	110 ÷ 120	220	2	100 ÷ 110	200	Follow the procedure for cooking the guinea fowl.
Rabbit pieces	Kg 1-1,2	2	55 ÷ 65	220	2	50 ÷ 60	200	Put all the pieces of the same size in the glazed tray. Season with herbs and spices. Turn the pieces as and when required.
• Cakes								
	700 gr	1	40	200	2	30 ÷ 35	180	Use a tin that is 22 cm deep. Pre-heat for 10 mins.
• Vegetable								
	800 gr	1	70 ÷ 80	220	1	60 ÷ 70	200	Cut the fennel into four pieces, add butter, salt and potatoes if required and place in a Pyrex face up. Cover the dish.
• Fruit								
	Kg 1	1	45 ÷ 55	220	2	45 ÷ 55	200	Bake the fruit in an open Pyrex or earthenware dish. Leave it to cool inside the oven.

TABLES OF COOKING TIMES

Food	Quantity	Static electric oven			Electric fan oven			Remarks
		Shelf	Time of cooking in minutes	Oven temperature	Shelf	Time of cooking in minutes	Oven temperature	
• Grilling								
Place the food to be grilled underneath the infra-red grill. Warning: When the grill is on it takes on a bright red colour. Place the tray underneath the grill to collect juices and fat from the food being grilled.								
Squares of bread for toasting	4 pieces	4	5 (5 to heat up grill)	grill	4	5 (10 to heat up grill)	grill	Lay the bread on the grill tray. When one side of the bread has been toasted, turn over and toast the other side. Remember: keep the toast warm at the bottom of the oven until you are ready to serve it.
Sausages	n°6 / Kg 0,9	4	25/30 (5 to heat up grill)	grill	4	15/20 (10 to heat up grill)	grill	Cut the sausages in half and lay them face down on the grill. Half way through grilling turn them over. Every so often, check that they are being cooked equally all over. (If this is not happening, turn and reposition the ones being cooked either less or more than the others.
Ribs of beef	n°4 / Kg 1,5	4	25 (5 to heat up grill)	grill	4	15/20 (10 to heat up grill)	grill	Make sure that the ribs of beef are exposed to the full effect on the main grill.
Chicken legs	n°4 / Kg 1,5	3	50/60 (5 to heat up grill)	grill	3	50/60 (10 to heat up grill)	grill	Turn them over twice during grilling.

12 MONTHS GUARANTEE

GUARANTEE CONDITIONS

- (a) Any claim during the period of the guarantee *MUST BE ACCOMPANIED WITH THE RECEIPT* relating to the original purchase.
- (b) The unit must be correctly installed and operated in accordance with the manufacturer's instructions and used for normal domestic purposes.
- (c) The guarantee does not cover accidental damage, misuse or alterations which are likely to affect the units.
- (d) The guarantee is invalid if the units is tampered with, or repaired by any unauthorised person.
- (e) The guarantee in no way affects your statutory rights.
- (F) U.K. Only.

PROCEDURE WHEN REPORTING A FAULT

1. Give full name, address including post code, home telephone number and business telephone number is appropriate.
2. Quote sales receipt number, make and model number of faulty appliance.
3. Give a summary of the problem.

GENERAL WARNINGS

Thank you for choosing one of our products. To get the most out of your oven we recommend that you:

- Read the notes in this manual carefully: they contain important instructions on how to install, use and service this oven safely.
- Keep this booklet in a safe place for easy, future reference.

When the oven is first switched on it may give out acrid smelling fumes. This is because the bonding agent for insulating panels around the oven has been heated up for the first time.

This is a completely normal, if it does occur you merely have to wait for the fumes to clear before putting the food into the oven.

An oven by its very nature becomes very hot. Especially the glass of the oven door.

Do not allow children to go near the oven when it is hot, especially when the grill is on.

A specially designed protector shield (some models only) which reduces considerably the surface temperature of the oven door can be obtained through our service organization. This shield is recommended for households with young children.

DECLARATION OF COMPLIANCE

- The parts of this appliance that may come into contact with foodstuffs comply with the provisions of EEC Directive 89/109.
- Appliance complies with European Directives 73/23/EEC and 89/336/EEC, replaced by 2006/95/EC and 2004/108/EC, and subsequent amendments.

When you have unpacked the oven, make sure that it has not been damaged in any way. If you have any doubts at all, do not use it: contact a professionally qualified person. Keep packing materials such as plastic bags, polystyrene, or nails out of the reach of children because they are dangerous for children.

SAFETY HINTS

- The oven must be used only for the purpose for which it was designed: it must only be used for cooking food. Any other use, e.g. as a form of heating, is an improper use of the oven and is therefore dangerous.
- The manufacturers cannot be held responsible for any damage caused by improper, incorrect or unreasonable use.
When using any electrical appliance you must follow a few basic rules.
 - Do not pull on the power cable to remove the plug from the socket.
 - Do not touch the oven with wet or damp hands or feet.
 - Do not use the oven unless you are wearing something on your feet.
 - Do not allow children or irresponsible people to use the oven unless they are carefully supervised.
 - It is not generally a good idea to use adapters, multiple sockets for several plugs and cable extensions.
 - If the oven breaks down or develops a fault switch it off at the mains and do not touch it.
- If the cable is at all damaged it must be replaced promptly. When replacing the cable, follow these instructions. Remove the power cable and replace it with one of the HO5RR-F, H05VV-F, H05V2V2-F type. The cable must be able to bear the electrical current required by the oven. Cable replacement must be carried out by properly qualified technicians. The earthing cable (yellow-green) must be 10 mm longer than the power cable. Use only an approved service centre for repairs and ensure that only original parts are used. If the above instructions are not adhered to the manufacturers cannot guarantee the safety of the oven.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- Children should be supervised to ensure that they do not play with the appliance.
- Never use a steam or high pressure spray to clean the appliance.

INSTALLATION

Installation is the customer's responsibility. The manufacturers have no obligation to carry this out. If the assistance of the manufacturer is required to rectify faults arising from incorrect installation, this assistance is not covered by the guarantee. The installation instructions for professionally qualified personnel must be followed. Incorrect installation may cause harm or injury to people, animals or belongings. The manufacturer cannot be held responsible for such harm or injury.

FITTING THE OVEN INTO THE KITCHEN UNIT

Fit the oven into the space provided in the kitchen unit; it may be fitted underneath a work top or into an upright cupboard. Fix the oven in position by screwing into place, using the four fixing holes in the frame.

To locate the fixing holes, open the oven door and look inside. To allow adequate ventilation, the measurements and distances indicated in the diagram on front page must be adhered to when fixing the oven.

Note: For ovens that are combined with a hob unit the instructions contained in the manual for the hob unit must be followed.

IMPORTANT

If the oven is to work properly, the kitchen housing must be suitable. The panels of the kitchen unit that are next to the oven must be made of a heat resistant material. Ensure that the glues of units made of veneered wood can withstand temperatures of at least 120 °C. Plastics or glues that cannot withstand such temperatures will melt and deform the unit. Once the oven has been lodged inside the unit, the electrical parts must be completely insulated. This is a legal safety requirement. All guards must be firmly fixed into place so that it is impossible to remove them without using special tools.

Remove the back of the kitchen unit to ensure an adequate current of air circulates around the oven. The hob must have a rear gap of at least 45 mm.

CONNECTING TO THE POWER SUPPLY

Plug into the power supply. Ensure first that there is a third contact that acts as earthing for the oven. The oven must be properly earthed.

If the model of oven is not fitted with a plug, fit a standard plug to the power cable. It must be able to bear the power supply indicated on the specifications plate. The earthing cable is yellow-green. The plug must be fitted by a properly qualified person. If the socket and the plug are incompatible the socket must be changed by a properly qualified person. A properly qualified person must also ensure that the power cables can carry the current required to operate the oven.

An ON/OFF switch may also be connected to the power supply. The connections must take account of the current supplied and must comply with current legal requirements. The yellow-green earthing cable must not be governed by the ON/OFF switch.

The socket or the ON/OFF switch used for connecting to the power supply must be easily accessible when the oven has been installed.

Important: During installation, position the power cable in such a way that it will not be subjected to temperatures of above 50 °C at any point.

The oven complies with safety standards set by the regulatory bodies. The oven is safe to use only if it has been adequately earthed in compliance with current legal requirements on wiring safety. You must ensure that the oven has been adequately earthed.

The manufacturers cannot be held responsible for any harm or injury to persons, animals or belongings caused by failure to properly earth the oven.

WARNING: the voltage and the supply frequency are showed on the rating plate (fig. on last page).

The cabling and wiring system must be able to bear the maximum electric power required by the oven. This is indicated on the specifications plate.

If you are in any doubt at all, use the services of a professionally qualified person.
